OBJECTIVE

Final-year Information Technology student seeking a Backend Developer position. Experienced in building systems with ASP.NET Core, C#, SQL Server, and RESTful APIs, with hands-on skills in backend development, business logic implementation, and database design. Aiming to strengthen system design and optimization skills while contributing to stable and maintainable software products.

EDUCATION

Can Tho University of Technology
2022 - 2026

Major: Information Technology
GPA (Current): 3.61 / 4.0

PROJECTS

SAPOCRAM – CUSTOMER AND SALES MANAGEMENT SYSTEM

Personal Project
05/2026 - 08/2026

Role: Full Stack Developer
GitHub: https://github.com/nguyenducdat-dev/sapocram

Technologies: ASP.NET Core, Web API, EF Core, SQL Server, JWT, Hangfire, SignalR, Postman, Bootstrap, Git/GitHub

- Analyzed business requirements and designed and developed interfaces for the system's core features.
- Developed the backend using the Controller – Service – Repository architecture, with JWT-based authentication and authorization.
- Designed the SQL Server database, using EF Core Database First and implementing business rules.
- Integrated Hangfire for background jobs, SignalR for near-real-time notifications, and VNPay Sandbox for payments.
- Applied transactions in the Service layer to ensure data consistency and tested APIs using Postman.

ONLINE CLASSROOM MANAGEMENT SYSTEM

3-Member Team Project
11/2025 - 01/2026

Role: Full Stack Developer
GitHub: https://github.com/nguyenducdat-dev/online-classroom

Technologies: ASP.NET Core MVC, C#, SQL Server, EF Core, AJAX, jQuery, Bootstrap, Git/GitHub

- Contributed to implementing user authentication and authorization.
- Designed the UI and developed backend features for the instructor side of the system.
- Took responsibility for designing and building the database for system data storage and management.

CERTIFICATIONS

English B1 Certificate (CEFR) – Can Tho University – 2025
