SUMMARY

Experienced in building web apps, internal tools, and integrating REST APIs. Dedicated to writing clean code and improving UI/UX through practical problem-solving.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js
- **State & Data Fetching:** Zustand, Redux Toolkit, TanStack Query, Axios
- **UI & Styling:** Tailwind CSS, shadcn/ui, Material UI (MUI), Ant Design
- **Forms & Validation:** React Hook Form, Zod, Yup
- **Tools:** Vite, Git, GitHub, GitLab, Figma, Postman

PROFESSIONAL EXPERIENCE

WALAI CT - Frontend Developer

11/2025 - 06/2026

Project: Tara - B2B Printing Order Platform Renewal

- **Description:** Renewal of a B2B printing order platform covering admin operations, responsive workflows, and ERP/API integration.
- **Role:** Frontend Developer (Admin Frontend Owner)
- **Team:** 5 members (3 Frontend, 2 Backend)

Key Contributions:

- Built and scaled a modular admin frontend platform covering product, customer, order, permission, and logging domains.
- Owned the implementation of configurable template and layout editor features with reusable editor components and live preview workflows.
- Established reusable frontend architecture patterns using React, Next.js, TanStack Query, and Zod for CRUD admin applications.
- Implemented multilingual support (i18n), reporting features, and dashboard visualizations.

FPT Software - Frontend Developer Intern

01/2024 - 04/2024

Project: FAMs - Fresher Academy Management System

- **Description:** An internal enterprise platform used to manage and track FPT's Fresher Academy training operations.
- **Role:** Frontend Developer

Key Contributions:

- Designed and improved user interfaces for a more intuitive and accessible experience.
- Built and refined responsive UI components for internal operational workflows.
- Supported process improvements and collaborated with the team to meet business requirements.

PROJECTS

1. API Hub - API Publishing & Deployment Platform

01/2025 – 05/2025

- **Description:** A centralized platform for publishing APIs, exploring dynamic documentation, and automating service deployments through node subscriptions.
- **Role:** Frontend Developer

- **Team:** 4 members (2 Frontend, 2 Backend)
- **Tech Stack:** React.js, Tailwind CSS, shadcn/ui, TanStack Query, Zustand, Redux Toolkit, Zod

Key Contributions:

- Collaborated with a 4-member team to architect and build a multi-role web application supporting five user roles: Guest, Admin, Staff, Provider, and Client.
- Developed an API Marketplace and Discovery Portal with TanStack Query for data fetching, caching, search, and filtering.
- Built interactive API submission, testing, and subscription workflows with Zod-based schema validation and Zustand for cross-step state management.
- Developed monitoring dashboards and log viewers for Providers and Admins, displaying transaction histories, operational metrics, and system activity.

2. Moon — Laundry Shop Startup Website

09/2024 – 12/2024

- **Description:** A real-world startup project developed through the university's Experiential Entrepreneurship program to digitize on-demand laundry services for local customers.
- **Role:** Frontend Developer
- **Team:** 4 members (2 Frontend, 2 Backend)
- **Tech Stack:** Next.js, TypeScript, Tailwind CSS, Zod

Key Contributions:

- Collaborated with a 4-member team to design and build a responsive web application for a local on-demand laundry service.
- Developed core customer-facing features including dynamic service catalogs, location information, and booking workflows.
- Implemented type-safe form handling and client-side validation with TypeScript and Zod, and integrated REST APIs for customer inquiries and order data.

EDUCATION

FPT University – 2020 – 2025
Bachelor of Software Engineering
