ABOUT ME

As a Software Engineering Student, I am passionate about writing code and developing high-quality software that meets people's needs. I have a strong interest in backend development, system design and AI-assisted applications, with a continuous drive to improve through real-wond engineering challenges.

EDUCATION

UNIVERSITY OF INFORMATION TECHNOLOGY - VNUHCM | 2023 - 2027

Major: Software engineering

- GPA 8.06
- English: IELTS 7.0

SKILLS

- Languages & Frameworks: Typescript (NestJS, ExpressJS), Python (FastAPI), Java (Spring boot)
- Database & Storage: PostgreSQL, MongoDB, Supabase, MiniO, Qdrant
- Infra & Messaging: Docker, Docker Compose, Socket.IO, Websocketrs, RabbitMQ
- Others: HuggingFace, Git, REST API, Postman, Linux, Unix CLI

EXPERIENCE

AIPOWER CO., LTD | FULLSTACK DEVELOPER INTERN Jan 2026 - Apr 2026

Basketball Analysis & Management Website

- Designed a hybrid Retrieval-Augmented Generation (RAG) pipeline for legal and report document Q&A.
- Integrated semantic vector search using Odrant with keyword-based filtering to reduce retrieval scope.
- Engineered metadata tagging system, reducing query latency from ~20s to under 5s in local testing.
- Integrated SS-compatible object storage with MiniO for document storage and retrieval.

PERSONAL PROJECTS

IELTS TEACHING ASSISTANCE WEBSITE | BACKEND DEVELOPER & TEAM LEAD Jul 2025 - Now

https://github.com/MinhDao-Tech/ielts-ai-tutor

- Designed a microservices architecture with NestJS and FastAPI
- Built a dedicated assignment intereservice with NestJS and MongoDB to manage flexible schemas for exams, and submissions.
- Designed a IELTS Rubrics-based scoring pipeline with gradient regression models, mitigating AI hallucination and achieving 0.72 MAE on test set.
- Developed an asynchronous grading pipeline using RabbitMQ to process IELTS writing and speaking tasks at scale.
- Containerized and deployed services to Fly.io using Docker Compose.

UITGO - RIDE HAILING MICROSERVICE | BACKEND DEVELOPER **Oct 2025 - Dec 2025**

https://github.com/MinhDao-Tech/ridehail-notify-service

- Built a real-time NestJS notification service using RabbitMQ for async delivery and WebSockets for live client updates.
- Standardized RSA-based JWT authentication across services
- Implemented PostgreSQL primary-replica replication with Docker Compose

BOOKING FLIGHT SERVER | BACKENG DEVELOPER Mar 2025 - Jun 2025

https://github.com/MinhDao-Tech/flightbooking-restful

- Built a ResTFul Spring boot backend system cooering account management, ticketing, payments, airports, airlines, and permissions, using relational SQL schema.
- Implemented secure authentication and validation, including OAuth 2.0, request validation, standardized HTTP error handling, and RRAC.
- Integrated Gemnil for context aware chatbot.
